Uses and Applications

- Automated Equipment
- Robotic Installations
- Personnel guides and protection
- Access protection
- Traffic guidance and control
- Door and gateway protection

Construction

- Posts and Base - Steel, Galvanised & powder coated
- Panel Boundry - Steel, Galvanised & powder coated
- Panel Fill (Mesh) - Steel, Galvanised & powder coated
- Panel Fill (Clear) - Polycarbonate
- Bollard - Steel, Galvanised & powder coated

Customisation - Although the above represent our standard configuration, with inhouse design and manufacture capability Centrix is able to customise its fencing product to your requirements.

Other Features and Benefits

- Complies with Australian Standard 4024.1 ("Safety of Machinery");
- Floor Restrictions - Our product caters to any floor configuration and will handle sloping and uneven floor surfaces;
- Durable - Metal components are galvanised and powdercoated. Galvanising prior to powdercoating provides superior corrosion protection to look respectable after years of service;
- Ease Of Installation - Customers can easily install the fence themselves or Centrix can install (if required);
- Fencing Posts - Are cable tray mounting ready and it is also possible to run cable through the post;
- Addition of Special brackets - Users have the ability to attach standard brackets to the posts (eg. cable trays, pipe clamps, cover strips, shelf brackets, shelves etc);
- Flexible Door Arrangements - Users can purchase a variety of door/entrance arrangements from swinging doors through to automated configurations;
